Printable Films for water based inks

ColorJet III™ is a film designed for dye or pigmented water based inks. It is matte white and opaque and can be applied to both light or dark fabrics.

Instructions for **ColorJet III™**

ColorJet III™ is produced in both 8½" X 11" and 11" X 17" cut sheets. They work very well in most desktop ink jet printers and can be applied with a hand held iron. **Will NOT work with laser printers.**

- ▶ Create your design in graphics software, such as [Corel Draw](#). **No need to mirror image**
- ▶ Load **ColorJet III™** onto your printer.

Print **right reading** on side without printed squares.

Tech Illustrations

(Under construction)

Cut out transfer with scissors

Carefully remove material with printed image from backing paper and place on garment.

- ▶ If applying with a hand iron, cover with the included parchment paper and iron for one and a half minutes constantly moving the iron back and forth in one direction.
- ▶ If using Heat Press, place a Teflon sheet between the heat platen and transfer to prevent sticking and edge damage of the transferred design.
- ▶ Heat press between **340° F - 350° F** for **15 - 20 seconds** using firm even pressure.
- ▶ If **ColorJet III™** only partially adheres to the fabric it is usually because insufficient or uneven pressure was applied. If this happens, reposition the design, increase the pressure and repress.
- ▶ Allow to completely cool.

Note: To ensure greatest durability of digital prints, garments should be turned inside out and washed in cold water without bleach of any type using a gentle wash cycle. Tumble dry low heat. When using ColorJet III, please wait at least 24 hours before first washing.

- ▶ Will adhere to most cotton and blend fabrics.
